

Seeking College Students - Virtual Minecraft Counselors

Background

Connected Camps offers online Minecraft programs where kids aged 8-13 explore, design, and build within multiplayer worlds. New players learn the basics of Minecraft while experienced players can tackle new challenges or learn advanced topics like programming, and game design. You will moderate the servers, mentor campers, and help them level up their expertise in designing and building on a multiplayer server. Join our community of passionate Minecraft mentors, gain experience as a camp counselor, and support young people in getting more creative with a game they love!

Position Summary

As a counselor, you will act as a primary mentor and moderator on our servers supporting our various programs. We offer programs such as Game Design, Engineering, Programming and more. You will also mentor a small group of volunteer counselors who provide learning and moderation support for the campers. Working with your team of fellow counselors, your job is to make the experience the best it can be for campers! Apply your coding and Minecraft expertise to teach others about the game and help resolve issues on the server. Show off your skills and inspire campers with your creations and give them new coding challenges to tackle. Train, collaborate, and problem-solve with your fellow team members online. Bring your enthusiasm and passion and help make Connected Camps a truly special experience!

Compensation

\$15/hour

General Skills

- Have expertise and passion for Minecraft
- Experience in online multiplayer Minecraft
- Willingness to teach and be a mentor to others, supporting them in leveling up their own expertise
- Have worked with kids age 9-13 in the past, preferably in an online environment
